MENTA SAS

**A pioneer in the European
reprogrammable
semiconductor industry**

(embedded Field Programmable
Gate Array – eFPGA)

<https://www.menta-efpga.com>

WHO ARE WE?

Menta SAS is a **privately held company** based in Sophia-Antipolis, France.

Lead by Vincent Markus, President and CEO and Yoan Dupret, CTO and Managing Director, Menta is **a semiconductor IP provider**, offering **a ground-breaking performance accelerator for edge computing in the form of embedded FPGA (eFPGA) IPs**.

Menta is funded by **FJV Investments**, a Luxembourg capital fund and backed up by the **European Investment Bank** with a **€7.5 million financing**.

WHY MENTA?

- **Menta eFPGA Soft IPs** offer SoC, ASIC and sensors designers the mean to evolve their chips over time and in the field for applications such as **security/cryptography, artificial intelligence, motor control and telecommunication**.
- Menta products are used worldwide by companies serving the **defense, space, internet of things, industrial, 5G or automotive markets**.
- **Embedded FPGA IPs** are offered today by fewer than 5 companies in the world, and Menta breakthrough technology is the most **flexible and adaptive**, positioning **Menta as the European and global leader in that space**.
- Menta counts as partners, amongst others, **Andes, Cudasip, Everspin and Secure-IC** and as customers, amongst others **CHX, Thales Alenia Space and Trusted Semiconductor Solutions**.
- Our design-adaptive standard cells-based architecture and state-of-the-art tool set provides **the highest degree of design customization, best-in-class testability, and fastest time-to-volume for SoC design targeting any production node at any foundry**.
